

MetroWest

May 2014

A Connected Community is a Protected Community.

The new silver cars and manpower you see in and around MetroWest are part of Critical Intervention Services (CIS). We have partnered with CIS to enhance MetroWest and help us build a stronger, more united community.

CIS is nothing like conventional security providers. They are public safety experts dedicated to strengthening communities through both proactive and preventative strategies that focus on community organization and connectedness. CIS will act as a liaison between MetroWest, community leaders, governmental entities, businesses, police and private security providers to seek solutions to enhance public safety within MetroWest to foster community involvement in public safety. To learn more about CIS, visit the Public Safety page on our website.
